

Veeraj Thota

Python Developer & AI/GenAI Engineer Intern Candidate

📍 Hyderabad | 📞 +91 8688301917 | ✉️ veerajthota42@gmail.com | 🌐 veeraj-thota-9463a1290 | 📧 vijay12968

Fourth-year B.Tech CSE student with **Python** as primary skill, focused on **AI/GenAI pipelines**, **LLM integration**, and **data-driven backend systems**. Built semantic search engines, crop intelligence tools, and LLM-powered document processors. **National Finalist** at Adobe India Hackathon (4,000+ teams). Seeking a Python/AI Internship to build scalable intelligent systems.

CORE PYTHON & AI SKILLS

Primary Language: Python (advanced) — scripting, automation, data pipelines, API services

AI / GenAI: LLM Integration, Claude AI, GPT APIs, Prompt Engineering, Semantic Search,

Libraries & Frameworks: FAISS, PyMuPDF, Streamlit, Pandas, NumPy, Requests, FastAPI (basics)

Databases: MongoDB, Supabase, SQL / RDBMS

Secondary: JavaScript / React (frontend), Tailwind CSS, REST APIs, Git, GitHub

Cloud & Tools: Oracle Cloud AI Foundations, Amazon AWS AI Basics, Vercel

PYTHON & AI PROJECTS

Intelligent Document Query System

Python • FAISS • Claude/GPT • PyMuPDF

2024

- Engineered automated clause extraction and semantic search over unstructured PDFs using **PyMuPDF** for parsing and **FAISS** for vector-based retrieval.
- Integrated **LLM reasoning** (Claude & GPT) to transform raw documents into structured, queryable outputs via a RAG pipeline.
- National Finalist (Round 2)** at Adobe India Hackathon — top bracket of 4,000+ national teams.

AgriConnect — Smart Crop Planner

Python • Streamlit • MongoDB • APIs

2024

- Built a Python decision-support system for crop recommendation and rainfall prediction using ML heuristics and live API data.
- Consumed and normalised third-party weather REST APIs; developed an interactive **Streamlit** dashboard for farmer end-users.
- Stored and queried crop data using **MongoDB** with optimised schema design.

Comora — Full-Stack Social Dining Platform

React • Supabase • Python utilities

2024

- Wrote Python utility scripts for data seeding, event processing, and backend automation.
- Implemented real-time data sync and secure user authentication through **Supabase**.

EXPERIENCE

Project Intern — Bytesedge, Hyderabad

Jan 2026 – Mar 2026

- Executed end-to-end testing and process analysis across the Python-driven Nammasmarana app lifecycle.
- Collaborated with engineers to document and refine build processes; automated QA workflow portions using Python scripts.

LEADERSHIP & ACHIEVEMENTS

Operations Lead — CSI, GRIET

2025 – Present

- Designed event flow for RESO'26; managed operations, logistics, and sponsor relations — improved execution efficiency by 25–50%.

National Finalist — Adobe India Hackathon Round 2 (top bracket of 4,000+ national teams)

Certifications: Oracle Cloud AI Foundations • Amazon AWS AI Basics

EDUCATION

B.Tech, Computer Science & Engineering — GRIET, Hyderabad

2023 – 2027

CGPA: 7.7 / 10

Intermediate (XII) — FIITJEE Saifabad

83% • 2023

CBSE (X) — St. Andrews School

91% • 2021
